

I know scientifically time is not moving faster, but the older I get, the more I understand why my mother has been telling me time moves faster as you get older. Realizing my babies have become young adults is a daily reminder of how fast time feels like it is flying by ... and technology is also moving faster than ever before; Exponentially!

We are in an industry that is constantly evolving and having to adapt to technological advancements. The impact of artificial intelligence, advanced analytics, and changes in compliance and regulatory requirements are just a few things we must keep ahead of.

Our technicians have to continually upgrade their skills to ensure compliance with industry requirements, as well as our internal policy updates. We are always researching new product and service opportunities for our customers, and vetting those that we feel will have the greatest benefit. It's a big job keeping on top of it all; bigger still as we test each new product so that we only endorse products that we've personally tested and trust.

Much to the delight of my wife, I've spent the past few months testing a new product feature that involves video vehicle analytics that one of our main product lines has started to roll out. Have I asked her to drive around the block on more than one occasion, in each of our cars to test a detection rule or a new alert functionality? Yes. Yes, I have. But hey, as part-time-empty-nesters, we've got more time on our hands, right?

~ David P. Clark, President

VICTORIA DAY HOURS OF OPERATION

Please take note that Huronia will be CLOSED on Monday, May 20th. We will re-open on Tuesday, May 21st. Our [24/7 ULC listed monitoring station](#) WILL remain open without interruption in monitoring service. 24/7 emergency support is also available if required.

WHAT IS PowerG? WHEN DO WE RECOMMEND IT? AND WHY!

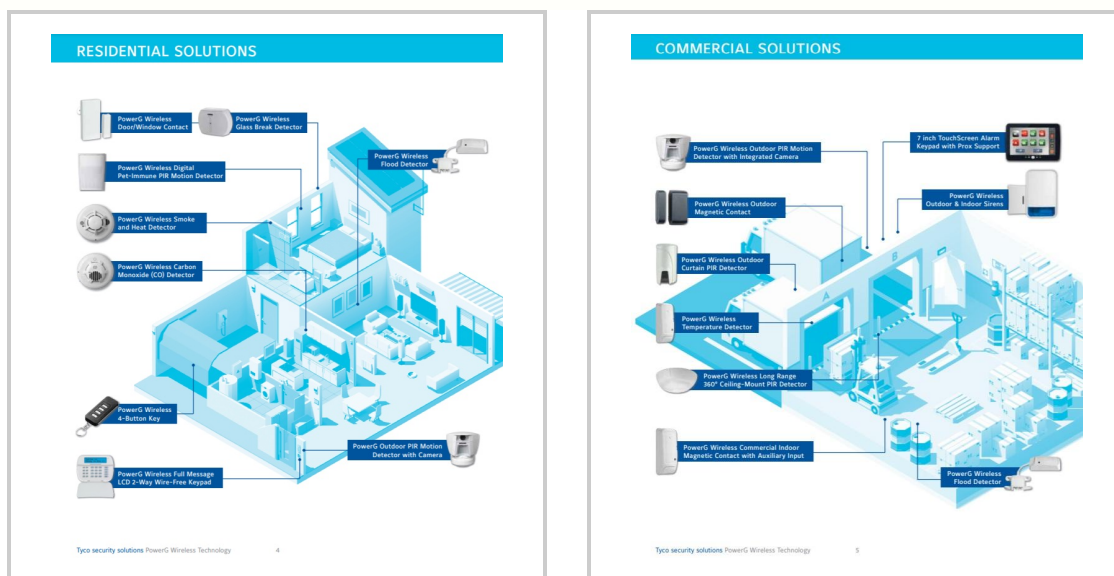

From our colleagues at [Digital Security Controls \(DSC\)](#), we want to spread the word about PowerG Technology and why we have chosen to partner with DSC to provide this wireless security product option to some of our residential and commercial customers when traditional wired security options may not be possible.

PowerG provides dependable, safe, worry-free, wireless encrypted technology.

1. The technology provides two-way long-range communication capabilities from sensors to panels and back. PowerG can communicate up to 2km line-of-site, which is approximately four times the distance of traditional wireless. This works well in situations where there are multiple outbuildings on a property or

- when there are cases where we simply cannot get a wire to an area that needs to be protected.
2. Power G's adaptive transmission technology ensures battery life is maximized to up to 7 years for most devices.
 3. We can use PowerG technology in instances where running wires is not possible (or not wanted by the customer).
 4. PowerG offers outstanding, encrypted wireless protection.

From control panels to keypads, modules, intrusion detectors, life safety sensors, personal panic buttons and the software support to power these products, PowerG from DSC has security solutions for residential and commercial requirements. Want to learn more about PowerG? **[Get in touch with us today.](#)**

WE ARE HIRING ALARM TECHNICIANS AND PART-TIME SECURITY GUARDS! HELP US FIND THE NEXT GREAT ADDITION TO OUR TEAM!

To support our commitment to exceptional customer service, we are always looking to have talented people join our team. Some of our best leads have come from our customers, so we are reaching out to you again! We are actively recruiting for the following positions:
