

Keep your basement dry.

We know security and monitoring very well... we've been doing it for over 40 years in our community. Whether it's your personal safety, or the contents of your home, cottage or business, Huronia provides the technology and installation know-how to protect you from theft and weather damage.

We own and operate our own ULC listed monitoring station, 24 hours a day, 7 days a week, so our response to you is immediate. We are local, and so are our responders.

The average cost of water damage claims in Canada has increased by 40% over the last 10 years.

Water damage surpasses fire damage as the **number one** reason for claims against homeowner policies. The Insurance Bureau of Canada (IBC) estimates that water damage claims cost Canadian insurers approximately \$1.7 billion annually.

- The majority of homes in Ontario have sump-pumps. However, older homes (built prior to 1980) drain directly into the sanitary sewer, and during extreme rainfalls this connection can cause back-ups.
- Sump-pumps require regular maintenance. Parts can rust, or wear, even if the pump isn't being frequently used. Huronia does not do sump-pump maintenance, but they can hold a key for your home and respond to a water alarm if you are unavailable. Huronia can then arrange for a plumber to attend if there is an issue with the pump.
- A power back-up for your sump-pump is also a good idea. If the power goes out (as it normally does during heavy rainfall) the pump won't work. This back up could be battery-powered, or generator-powered. An alarm on the pump is also encouraged by Canadian insurers who may offer discounts for a portion of home coverage if these precautions are in place.
- Huronia generally hardwires the sump-pump and can also install a wireless device as a further back-up. Huronia offers floor sensors as well, which can help monitor sump-pump failure. When water is detected, the monitoring station notifies the homeowner immediately.

Water detection alarms provide a warning system for floods, leaks and overflows.

The \$495 is for either hard wired, or wireless applications. If you require one or more floor sensors, or sump pits, additional pricing would apply.

This offer applies only to residential installations with standard telephone lines. Cellular options available. Huronia covers all parts and installation with a two year warranty.
